Project Team and Organization

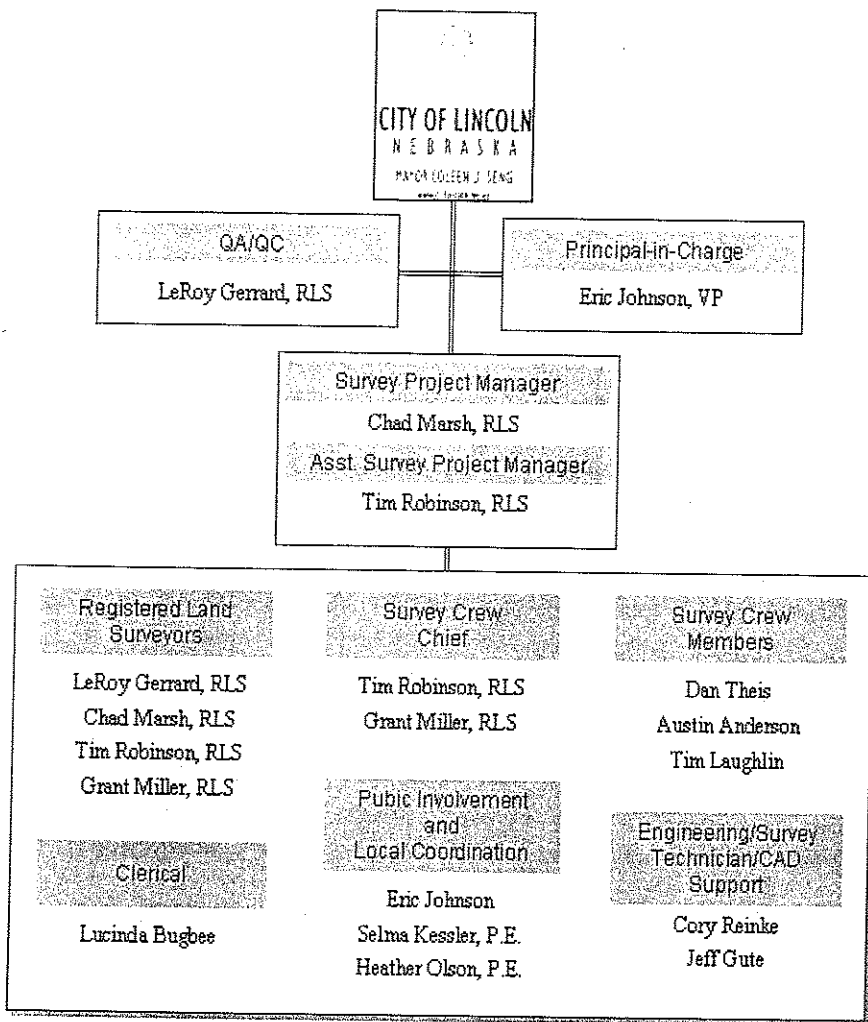

One of your most important considerations when selecting a consultant is the project team that will actually be performing the work. The project team must be comprised of individuals that you are comfortable with and have confidence in their abilities to manage a project to a successful completion. KM has assembled a team of professionals that are familiar with the City of Lincoln staff from previous projects and have the hands-on experience to deliver a successful project.

LeRoy Gerrard, R.L.S. #290. is a registered land surveyor with more than 30 years experience. He is responsible for the scheduling, performance, and quality control for all land surveys and construction staking projects within his service area. LeRoy serves as County Surveyor for the counties of Boone, Clay, Nance, and Polk. He presently serves as the highway superintendent for Boone and Nance Counties in Nebraska. As such, he advises County officials on their one and six-year programs, completes all state-required reports, oversees county construction programs and attends board meetings as required.

Chad Marsh, R.L.S. #560 is a registered land surveyor with more than 14 years of experience. He has provided construction surveys, topographic and design surveys, subdivision surveys, and ground control surveys for photogrammetry on a variety of projects. He also has a strong background in boundary surveying including riparian rights survey. Chad's construction background includes staking of large highway expressways, railroad and municipal streets improvements. Chad also has 10 years of experience working with county surveyors establishing lost and obliterated section corners, which included all of the research and field searches.

Tim Robinson, R.L.S. #625 is a registered land surveyor with more than 8 years of survey experience and has been with Kirkham Michael for three years. Tim has worked on many SID, City and County Projects. He is very knowledgeable on GPS Survey techniques as well as conventional survey methods.

Grant Miller, R.L.S. #623 has been primarily involved in the preliminary survey and inspection for site development projects (including utilities, paving, and landscaping), municipal paving, storm sewer, sanitary sewer, and water distribution systems. Miller's specific project experience includes preliminary survey and inspection.

2. KM submits survey notes, plats and other pertinent information to the QA/QC officer a specified number of weeks prior to each submittal. This time will vary depending on the project size and number of drawings to review.
3. The QA/QC officer reviews the documents for accuracy, completeness and overall appearance. The officer distributes parts of the project to KM staff with expertise in the survey discipline, which has not been involved with the project. The officer summarizes the comments and recommendations from the independent reviewers and delivers the comments to the survey project manager.
4. The survey project manager reviews the comments and makes the necessary revisions prior to the submittal to the City.
5. Prior to the 90% submittal, KM's Construction Services Department will review the contract documents plans for constructability, potential change orders, and utility conflicts. The quantities and unit costs are also checked for reasonableness.

This QA/QC process is in addition to the reviews and checks performed daily through the course of the survey activities. All redlines are back checked by the project manager and lead designer for accuracy and completeness. Redlines are kept for the duration of the project.
